Summary: With things back to normal, Judy and Nick learn the hard way that you can't nab all the criminals at once. However, a strange artifact crash lands in Zootopia, and Judy ends up touching it, and soon, there's millions of Judy Hopps clones roaming around the city.

### The Judy Hopps Force

Judy Hopps is a determined, independent, strong willed individual who always tries and never gives up. Ever since she was a child she has dreamed of being a police officer in order to make the world a better place. She graduated valedictorian of her police academy despite being told to quit and having initially been the slowest and weakest of her classmates.

Once she sets her mind on something, she refuses to back down. She can be impulsive and is very stubborn and determined especially when it comes to stopping crime and has a strong sense of justice. She can be very forgiving, such as forgiving Gideon Grey for his bullying back when they were young. She is also a very kind and friendly individual but can be sarcastic and defensive when she feels threatened or insulted. She initially held a rosy view of the world, believing Zootopia was a place where everyone was treated equal and believing that tomorrow would be a better day.

Even after learning the world is not perfect, she continues to be optimistic and strives to help make a better world. Also, despite being somewhat naive and not street smart, she can be very clever as she tricked Nick into helping her as he was the only witness before Mr. Otterton's disappearance by recording his confession of tax evasion and later recording Bellwether's crazed speech about causing the predators to go savage to eliminate them. She is intelligent and hates being called a "dumb bunny", and she is dedicated to her job, whether working as a parking enforcement officer or later on as an actual police officer. She has even shown throughout the film her

extensive knowledge and memory of the law enforcement rules.

She holds the safety of others first and never forgets that a police officer's job is to serve and protect the people, at one point even saving Fru Fru's life despite being in pursuit of Duke Weselton. She is brave and puts herself in danger constantly to find the truth and set things straight. She is also short-tempered and impulsive, doing things on the spot without thinking about the consequences such as accidentally acting insubordinate to Chief Bogo by promising to find Mr. Otterton to Mrs. Otterton and hijacking the train that contained all the Night Howlers grown and used to cause animals to go savage.

She believes that people should be treated equally regardless of species or whether they are predator or prey. Despite this, however, deep down she held a mild fear of predators as she kept fox repellent with her wherever she went and nearly used it on Nick when they first met and once more when he was angered by her unintentionally bigoted comments about predators. She also accidentally stated how the predators had gone wild because of their "biology". However, she has since learned from her mistakes. She will even stand up to bigger enemies to fight for what is right.

However, even as a good enforcer of the law, Zootopia's well known officer, Judy, knows that you can't nab all the bad guys at once
